PROFESSIONAL SUMMARY

Final-year CS student serving as Technical Team Lead at Wadi Makkah Company For Technology, where I architect autonomous multi-agent AI systems, engineer containerized production environments, and lead full-stack platform development with Next.js. I build what I understand — from LLM orchestration pipelines to normalized relational schemas — and have led cross-functional teams of up to 9 engineers in a real co-op setting. Seeking a Software Engineering or AI development role where I can ship meaningful work from day one.

EXPERIENCE

Wadi Makkah Company For Technology

Makkah, Saudi Arabia

Software & AI Engineering Co-op Trainee | Team Lead

Jun 2026 – Present

- Coordinated technical direction across the trainee cohort throughout the co-op program, aligning priorities and supporting peer development.
- Nominated by company leadership as Technical Organizer & Mentor at MiyahThon hackathon, guiding teams on technical feasibility and system architecture.
- Architected an autonomous Multi-Agent HR screening system using CrewAI, Gemini API, and Streamlit with hierarchical orchestration and multimodal OCR.
- Co-engineered the Coworking Pass platform (Next.js, PostgreSQL, Tailwind), managing repository structure and cross-team feature integration.
- Managed Docker containerized environments for local company deployments and hosted Hugging Face NLP sentiment models.
- Evaluated Saudi HUMAIN AI platform APIs (Fuse), benchmarking LLMs, Arabic Speech-to-Text (Cohere Transcribe A), and vision models.

Hajj Season

Makkah, Saudi Arabia

Hajj Organizer & Crowd Management Lead

Two Seasons Experience

- Directed high-density crowd operations and real-time communications under high pressure across two consecutive Hajj seasons.
- Demonstrated exceptional crisis management, rapid decision-making, and cross-cultural coordination in high-stakes environments.

FEATURED PROJECTS

TripMate Platform (BSc Capstone)

Laravel, PHP, MySQL, Tailwind CSS

- Built a bilingual (AR/EN) marketplace platform connecting tourists with verified local guides across Saudi Arabia with dynamic booking workflows.
- Designed and normalized a scalable MySQL schema with role-based access control (tourist, guide, and admin dashboards).

Coworking Pass Platform

Next.js, PostgreSQL, Tailwind CSS, GitFlow

- Developed a unified Saudi B2B2C coworking aggregator with a single subscription, QR attendance verification, and partner revenue sharing.
- Headed the project management team: defined sprint milestones, reviewed and merged pull requests, and coordinated 4 sub-teams to launch the MVP.

AI-Powered HR & CV Multi-Agent System

CrewAI, Gemini 2.5 API, Streamlit, Python

- Engineered an autonomous recruitment intelligence system automating resume screening and job-fit matching across 5 specialized AI agents.
- Enforced 4 structural security layers (size limits, content validation, anti-hallucination guardrails) and integrated multimodal OCR.

EDUCATION

Umm Al-Qura University

Makkah, Saudi Arabia

Bachelor of Science in Computer Science (GPA: 3.43 / 4.00)

Expected January 2027

CERTIFICATIONS & TRAINING

- Project Management Professional (PMP)** – EMDAD ALMARIFAH FOR TRAINING (35 hrs)
- Artificial Intelligence: Fundamentals & Advanced Applications** – SDAIA (2025)
- Power BI for Data Analysis** – EMDAD ALMARIFAH FOR TRAINING (30 hrs)
- Data Analysis using Microsoft Excel** – EMDAD ALMARIFAH FOR TRAINING (30 hrs)

TECHNICAL SKILLS

Programming:	Python, JavaScript, PHP, Java, SQL, PL/SQL, HTML5/CSS3
Frameworks & Web:	Next.js, React, Node.js, Express.js, Laravel, Streamlit, Tailwind CSS
AI & Data:	CrewAI, Multi-Agent Systems, Gemini API, HUMAIN API, Prompt Engineering, Power BI
DevOps & Tools:	Docker, Git & GitHub (GitFlow), PostgreSQL, MySQL, VSCode, Figma
Languages:	Arabic (Native), English
