PROFESSIONAL SUMMARY

Software Engineer & Technical Project Manager bridging practical software development, AI, and structured project delivery. Experienced in full-stack web platforms (Next.js, Laravel), autonomous Multi-Agent workflows (CrewAI, Gemini), and leading cross-functional engineering teams to deliver MVPs with PMP-aligned sprint management and GitFlow. Proven ability to handle extreme operational pressure and crisis coordination across two consecutive Hajj seasons.

EXPERIENCE

Wadi Makkah Company For Technology — **Makkah, Saudi Arabia**
AI Trainee — *Jun 2026 – Present*

- Co-engineered the Coworking Pass platform (Next.js, PostgreSQL, Tailwind) and headed project management for a cross-functional technical team, directing sprint milestones and GitFlow PR reviews to launch the MVP.
- Evaluated Saudi HUMAIN AI platform APIs (Fuse), benchmarking LLMs (Qwen, Kimi, GLM), Arabic Speech-to-Text, and vision generation models.
- Architected an autonomous Multi-Agent HR screening system (CrewAI, Gemini, Streamlit) with hierarchical orchestration, multimodal OCR, and anti-hallucination guardrails.
- Developed early Computer Vision and ML prototypes, utilizing OpenCV for image processing along with classification and regression algorithms.
- Managed Docker containerized environments for local company deployments and hosted Hugging Face NLP models.

AL-YAMAMA Company — **Makkah, Saudi Arabia**
Platform Agent — *May 2026 (Two Seasons Experience)*

- Managed high-density pilgrim movement on train platforms across two consecutive Hajj seasons, actively preventing stampedes and ensuring passenger safety.
- Coordinated train dispatch signaling (platform clearance) under extreme high-pressure conditions during peak days.
- Demonstrated rapid decision-making, crisis management, and cross-cultural communication in high-stakes environments.

FEATURED PROJECTS

TripMate Platform (BSc Capstone) — **Laravel, PHP, MySQL, Tailwind CSS**

- Built a bilingual (AR/EN) marketplace platform connecting tourists with verified local guides in Saudi Arabia with dynamic booking.
- Designed and normalized a scalable MySQL schema with role-based access control (tourist, guide, and admin dashboards).

Coworking Pass Platform — **Next.js, PostgreSQL, Tailwind CSS, GitFlow**

- Developed a unified Saudi B2B2C coworking aggregator with a single subscription, QR attendance verification, and partner revenue sharing.
- Headed the project management team: defined sprint milestones, reviewed pull requests, and coordinated 4 sub-teams to launch the MVP.

AI-Powered HR & CV Multi-Agent System — **CrewAI, Gemini 2.5 API, Streamlit, Python**

- Engineered an autonomous recruitment intelligence system automating resume screening and job-fit matching across 5 specialized AI agents.
- Enforced 4 structural security layers (size limits, content validation, anti-hallucination guardrails) and integrated multimodal OCR.

EDUCATION

Umm Al-Qura University — **Makkah, Saudi Arabia**
Bachelor of Science in Computer Science (GPA: 3.43 / 4.00) — *Expected January 2027*

CERTIFICATIONS & TRAINING

- **Project Management Professional (PMP)** – EMDAD ALMARIFAH FOR TRAINING (35 hrs)
- **Artificial Intelligence: Fundamentals & Advanced Applications** – SDAIA (2025)
- **Power BI for Data Analysis** – EMDAD ALMARIFAH FOR TRAINING (30 hrs)
- **Data Analysis using Microsoft Excel** – EMDAD ALMARIFAH FOR TRAINING (30 hrs)

TECHNICAL SKILLS

Core Competencies:	Software Engineering, AI & ML, Data Analysis, BI, Web Development, Crisis Management
Programming:	Python, JavaScript, PHP, Java, SQL, PL/SQL, HTML5/CSS3
Frameworks & Web:	Next.js, React, Node.js, Express.js, Laravel, Streamlit, Tailwind CSS
AI & Data:	CrewAI, Multi-Agent Systems, Gemini API, Prompt Eng, Pandas, Power BI
DevOps & Databases:	Docker, Git (GitFlow), PostgreSQL, MySQL, Oracle SQL, Figma
Languages:	Arabic (Native), English
